PETITION

Honorable Commissioner of Patents
and Trademarks
Washington, D.C. 20231

ATTN: Box DAC

Dear Sir:

Petition is hereby made pursuant to 35 U.S.C. §41 and 37 C.F.R. §1.137(b) for the above-styled application for failure to prosecute.

Enclosed are the following:

- (1) A statement that the delay was unintentional;
- (2) A proposed response, which response was also faxed on October 18, 2002; and

PETITION
Serial No. 09/ 652,048
Art Unit: 3635

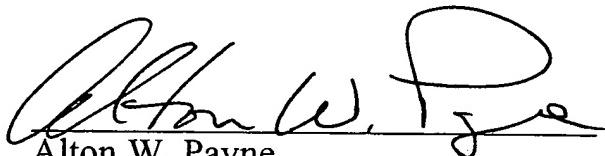

- (3) A petition fee in the amount of \$650.00 as set forth in 37
C.F.R. §1.17(m).

R E M A R K S

Petition is made for the above-identified application in which any delay was unintentional.

Delay in the present application was unintentional and continued prosecution of the application is respectfully requested.

Respectfully submitted,

Alton W. Payne

WARNING

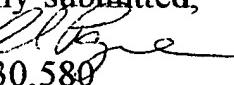

The documents accompanying this facsimile transmission contain information which is confidential or privileged. The information is for the use of the individual or entity named on this transmission sheet. Only the addressee may review its contents. If you are not the intended recipient, be aware that any disclosure, copying, distribution or use of the contents of this faxed information is prohibited. If you have received this facsimile in error, please notify us by telephone immediately so that we can arrange for the retrieval of the original documents at no cost to you.

Dear Examiner Horton,

Per our telephone conversation last week, attached are "clean" copies of the pages that were amended for the captioned patent application. The nine (9) pages submitted are 15, 47, 49, 50, 51, 52, 53, 54 and 55. Page 55 is now a blank page.

If you need a clean copy of the entire application (56 pages), please contact me and we will mail, fax or email it to you, whichever you request.

Respectfully submitted,

Al Payne 
Reg. No. 30,580

system of the present invention having elements that are bendable metal.

FIG. 21A a sectional illustration of a channelled bottom track used in association with the wall system of the present invention having a data channel.

5 FIG. 21AA a sectional illustration of another channelled bottom track used in association with the wall system of the present invention having a data channel.

10 FIG. 21AAA a sectional illustration of yet another channelled bottom track used in association with the wall system of the present invention having a data channel.

FIG. 21B is a sectional illustration of another channelled bottom track used in association with a load-bearing wall system of the present invention having a data channel.

15 FIG. 22A is a sectional illustration of another channelled bottom track used in association with a wall system of the present invention having a data channel.

FIG. 22AA is a sectional illustration of an alternate embodiment of the one piece base track with a raised channel-seat for the stud.

20 FIG. 22B is a sectional illustration of another channelled bottom track used in association with a wall system of the present invention having a data channel .

25 FIG. 22C is a sectional illustration of another channelled bottom track used in association with a load-bearing wall system of the present invention having a data channel.

FIG. 23 illustrates a one-piece head track for use with one embodiment of the present invention.

The above general description and the following detailed description are merely illustrative of the generic invention, and

bottom track 2122 has flush base trim 2130 with a raised channel seat for accepting the stud 2120. As in the other embodiments, the base trim 2130 is affixed to the bottom track 2122, but not the panel 2102, for easy removal. As with the other embodiments of the present invention, treated screws 5 2104F may be used.

FIG. 21B is a sectional illustration of another channelled bottom track 2122 used in association with a load-bearing wall system of the present invention having a data channel 2122A. The bottom track 2122 has flush base trim 2130 with a raised channel seat for accepting the stud 2120. As in 10 the other embodiments, the base trim 2130 is affixed to the bottom track 2122, but not the panel 2102, for easy removal. As with the other embodiments of the present invention, treated screws 2104F may be used.

FIG. 22A is a sectional illustration of another channelled bottom track 2222 used in association with a wall system of the present invention having a 15 data channel 2222A. The bottom track 2222 has flush base trim 2230 with a raised channel seat for accepting the stud 2220. As in the other embodiments, the base trim 2230 is affixed to the bottom track 2222, but not the panel 2202, for easy removal. As with the other 20 embodiments of the present invention, treated screws 2204F may be used.

FIG. 22AA is a sectional illustration of an alternate embodiment of the one piece base track with a raised channel-seat for the stud.

FIG. 22B is a sectional illustration of another channelled bottom track 2222 used in association with a wall system of the present invention having a 25 data channel 2222A. The bottom track 2222 has flush base trim 2230 with a raised channel seat for accepting the stud 2220. As in the other embodiments, the base trim 2230 is affixed to the bottom track 2222, but not the panel

WHAT IS CLAIMED IS:

1 1. A demountable and reusable wall assembly for
2 partitioning a room space between an overhead and a floor
3 comprising:

- 4 (a) a plurality of panels having edges at the
5 extremities,
6 (b) a plurality of studs for supporting the panels,
7 (c) a plurality of long-term removable fasteners,
8 (d) a tape, and
9 (e) a tab associated with the tape,

10 the panels are affixed to the studs at the panel
11 edges to form a seam, the long-term, removable
12 fasteners secure the adjacent panels to the studs,
13 the seam and long-term removable fasteners are
14 covered with the tape and covered with a mud
15 compound, the tape is sufficiently strong to be
16 removed, when the wall assembly is demounted,
17 the tape and the mud compound is disengaged
18 from the panels thereby exposing the long-term
19 removable fasteners such that the long-term
20 removable fasteners are easily removed and the
21 panels and studs disassembled, the heads of the

22 long-term removable fasteners are kept clean for
23 easy engagement and removal and the tape is
24 sufficiently unporous to prevent the mud
25 compound from penetrating through the tape to fill
26 the heads of the long-term fasteners.

1 2. A demountable and reusable wall assembly for
2 partitioning a room space between an overhead and a floor
3 comprising:

- 4 (a) a plurality of panels having edges at the
5 extremities,
6 (b) a plurality of studs for supporting the panels,
7 (c) a plurality of long-term removable fasteners,
8 (d) a tape,
9 (e) a tab associated with the tape, and
10 (f) a releasable adhesive,

11 the panels are affixed to the studs at the panel
12 edges to form a seam, the long-term, removable
13 fasteners secure the adjacent panels to the studs,
14 the seam and long-term removable fasteners are
15 covered with the tape and covered with a mud
16 compound, the tape is sufficiently strong to be
17 removed, when the wall assembly is demounted,
18 the tape and the mud compound is disengaged
19 from the panels thereby exposing the long-term
20 removable fasteners such that the long-term
21 removable fasteners are easily removed and the

22 panels and studs disassembled, the heads of the
23 long-term removable fasteners are kept clean for
24 easy engagement and removal and the tape is
25 sufficiently unporous to prevent the mud
26 compound from penetrating through the tape to fill
27 the heads of the long-term fasteners, the panels
28 are also affixed to the studs not at the panel edges
29 using the releasable adhesive.

1 3. A demountable and reusable wall assembly for
2 partitioning a room space between an overhead and a floor
3 comprising:

- (a) a plurality of panels having edges at the extremities,
 - (b) a plurality of studs for supporting the panels,
 - (c) a plurality of long-term removable fasteners,
 - (d) a tape,
 - (e) a tab associated with the tape, and
 - (f) a releasable adhesive,

the panels are affixed to the studs at the panel edges to form a seam, the long-term, removable fasteners secure the adjacent panels to the studs, the seam and the long-term removable fasteners are covered with the tape and covered with a mud compound, the tape is sufficiently strong to be removed, when the wall assembly is demounted the tape and the mud compound is disengaged from the panels thereby exposing the long-term removable fasteners such that the long-term removable fasteners are easily removed and the

22 panels and studs disassembled, the heads of the
23 long-term removable fasteners are kept clean for
24 easy engagement and removal and the tape is
25 sufficiently unporous to prevent the mud
26 compound from penetrating through the tape to fill
27 the heads of the long-term fasteners, further,
28 the panels are also affixed to the studs not at the
29 panel edges using the long-term, removable
30 fasteners to secure the middle portion of the panels
31 to the studs intermediate of the extremities of the
32 panel, and the long-term removable fasteners are
33 covered with the tape and covered with a mud
34 compound, the tape is sufficiently strong to be
35 removed, when the wall assembly is demounted
36 the tape and the mud compound is disengaged
37 from the panel thereby exposing the long-term
38 removable fasteners such that the long-term
39 removable fasteners are easily removed and the
40 panels and studs disassembled.
